

Amendments to the Claims

1. (Original) A polyaniline-containing composition, characterized by comprising a polyaniline and an emulsion polymer, wherein the emulsion polymer including a vinylpyrrolidone and an acid group-containing monomer as constituent monomers and as essential components.

2. (Original) The polyaniline-containing composition according to claim 1, wherein the content of the vinylpyrrolidone is in the range of 10 to 70 % by mass in the total constituent monomers for the emulsion polymer.

3. (Currently amended) The polyaniline-containing composition according to claim 1 ~~or 2~~, wherein the content of the acid group-containing monomer is in the range of 0.1 to 40 % by mass in the total constituent monomers for the emulsion polymer.

4. (Currently amended) The polyaniline-containing composition according to ~~any one of claims 1 to 3~~ claim 1, wherein the polyaniline is an emeraldine-type polyaniline.

5. (New) The polyaniline-containing composition according to claim 2, wherein the content of the acid group-containing monomer is in the range of 0.1 to 40 % by mass in the total constituent monomers for the emulsion polymer.

6. (New) The polyaniline-containing composition according to claim 2, wherein the polyaniline is an emeraldine-type polyaniline.

7. (New) The polyaniline-containing composition according to claim 3, wherein the polyaniline is an emeraldine-type polyaniline.

8. (New) The polyaniline-containing composition according to claim 5, wherein the polyaniline is an emeraldine-type polyaniline.
